Industries (Pty)Ltd

Air or Cable Controlled Power Take Offs

- Comprehensive range of PTO's to suit most makes of transmissions.
- Selection of output ratios and power to suit most applications.
- Hydraulic pump direct mount.
- Multistandard propshaft drive flanges.

Piston Pumps and Throttle Governor

- Bi-rotational piston pumps.
- 12 to 108 cc/rev capacity.
- 400 bar maximum pressure.
- 2400 rpm maximum speed-Direct or remote mount to PTO's.
- Load sensing throttle governor for auto control of engine rpm valve.

Air Controls and Toggle Switches

- Combined air control for PTO and tipping.
- Variable lowering speeds.
- Auto PTO disengagement.
- Toggle air switches available in single and double bank to operate PTO's, control valves and tailgates etc...

Gear Pumps

- Comprehensive range of single and dual rotation gear pumps.
- 15 to 216 cc/rev capacity-Pressure up to 340 bar.
- 3000rpm maximum speed-Direct or remote mount to PTO's.

Clutch Operated Power Take Offs

The ideal PTO for waste management vehicles and other applications on automatic and conventional transmissions where frequent shifting of the PTO is required.

Layshaft Power Take Offs

- Comprehensive range of layshaft PTO's designed to ISO Standard-Selection of ratios and output power to suit most applications
- Hydraulic pump direct mount.
- Multistandard prop-shaft drive flanges.
