PANEL-LOC VAN

Panel-Loc

The  brand of volume vans that have supported the transport industry for past decades.....   introduces the new exciting, cost effective concept  **PANEL-LOC !**

SPECIFICATIONS & FEATURES

What is a Panel-Loc?

- An extruded aluminium interlocking plank design to form a robust, tough and smooth outer body system mounted to an innovative floor structure.
- Designed for the harsh South African road conditions.

Why Panel-Loc?

- No leaking joints or the need to replace rivets.
- Maximizing payload and security.
- Self sealing concave jointing system.
- No rivets to interfere with costly marketing space and brand images.
- Greater improved resistance to external damage by denting and ripping.
- Integral ribbing supports, give rigidity for the location of internal fixtures and freight locking systems.
- Available in painted or mill finish.
- One piece roof structure.
- Kick plates or crumb rails.
- Wooden or galvanized slat liners.
- Solid pressed composite rear door structure with moulded edge seal.
- Roll-up or over rear door option.
- Suitable for semi-insulated applications.
- Ease of repair in the event of damage.
- Available in kit or FBU format.
